

Accommodations

Base Camp accommodations include single-occupancy tents with room for a cot (provided), fan (provided), two footlockers, and all your gear. The blue tarp is installed over the tent to reduce heat and increase your comfort on rainy nights. Tents are also supplied with one double electrical outlet. The entire camp has concrete sidewalks to combat the rain too.

Restaurant Dining

Meals are made to order. You can choose from many Lao traditional rice and noodle dishes or order more American-style dishes like soup and fries. Drinks include hot coffee, tea, soda, water, and juice.

You can also bring your own food when you deploy and cook it with the burners, toasters, and microwaves in the dayroom.

US Dollars, Thai Baht, and Lao Kip are all acceptable here.

Break Area

Team members gather for breakfast and coffee before flying out to their sites. After dinner, the restaurant becomes a nightly gathering place for unwinding, playing cards, listening to music or watching DVDs.

Recreation

Recreational gear and equipment includes several universal weight machines and many free weights.

There are also lawn darts, horseshoes, table tennis, baseball gear, and a full size basketball court.

Communications

The communications center provides continuous contact with in-country Detachment and HQ staff in Hawaii.

Mission permitting, we can also relay two-way email for you by disk, and morale calls can be made by iridium and InMarSat phone per the Det Commander's discretion.

Daily News

In the Day Room, you can catch up on world events with CNN on the satellite TV or watch DVD movies.

Teams also frequently use the room to debrief the day's operations in the evenings and play card and board games.

Hygiene

Hygiene facilities include male/female hot showers, private-stall latrines, and a hand-washing/shaving station.

The latrines work by gravity, so fill up the bucket provided to flush.
